

Four things. **Every day.**

The app is how the office knows the fleet is running, how your mileage and fuel are worked out, and how your claims get paid. Keep it fed and it works for you.

1

Sign in every day

Open PRUMAC Connect and sign in with your Driver ID and password.

Your Driver ID is your PMD number — PMD001, PMD014, and so on. Signing in marks your attendance for the day.

2

Log every trip

Start the trip **before** you drive off. End it when you park.

Do the vehicle checklist first, then enter the odometer reading and photograph it. A trip that was never started cannot be ended later.

3

Report every fault

Anything broken, leaking, worn or not working — report it the same day.

Brakes, tyres, lights, wipers, warning lamps, strange noises. A small fault reported today is a repair; ignored, it becomes a breakdown on the road.

4

Log every repair you pay for

Paid for a repair or a part out of your own pocket? Log it and photograph the receipt.

The accountant reviews the claim and reimburses it. No receipt in the app means no record — and no refund.

Not in the app?

Then as far as the office, the accountant and the workshop are concerned, it did not happen. Log it while you remember it — not at the end of the week.

 **No signal? Carry on.** The app still opens and keeps your work on the phone. It sends everything to the office by itself as soon as you are back in coverage. Open the app once where there is signal first, so it can save your screens.
